

Monsoon Season

A School Assembly Speech — Six Versions

A1**A2****B1****B2****C1****Phrasal Verbs**

Five speeches on *Monsoon Season*, written to CEFR levels A1–C1, plus a special Phrasal-Verb edition — each in a formal school-speech style with a clear introduction, body and conclusion.

Key vocabulary is highlighted in-line and explained afterwards in English and Hindi, so the speech can double as a vocabulary lesson.

- CEFR-level vocabulary (Red · Bold · Italic)
- Phrasal verbs (Green · Bold)

A1 — Beginner

Monsoon Season

Good morning to our respected Principal, my teachers, and my dear friends.

Today, I want to talk to you about the **Monsoon** season. Monsoon is the **rain** season. It comes every year after the hot summer.

In the monsoon season, the sky becomes full of dark clouds. Then the rain falls down. The rain makes the air feel **cool** and **fresh**. I am very **happy** when the rain comes.

The rain gives water to the trees and plants. The plants turn **green** and beautiful. The flowers open and look very pretty. Birds sing happy songs in the rain. Farmers are also happy because the rain helps them grow rice, wheat, and other crops in their fields.

We children love the monsoon very much. We wear a **raincoat** and carry an **umbrella** to school. We like to jump in small puddles of water. It is so much fun to play in the rain! Sometimes, our school gives us a holiday because of heavy rain, and we feel very excited.

But monsoon can also bring some problems. When there is too much rain, water fills the roads. This is called a flood. The roads become **dirty** and it is not safe to walk. We must be careful and not play near deep water.

We also hear loud thunder and see bright lightning in the sky. Some small children feel a little scared, but it is just a normal part of nature.

In the end, I want to say that monsoon is a wonderful **gift** from nature. It gives us water to drink, and it helps grow our food. Let us enjoy the rain safely and keep our school and home clean.

Thank you to all of you for listening to me.

CEFR Vocabulary Used

Word / Phrase	English Meaning	Hindi Meaning
Monsoon	the rainy season	मानसून — बरसात का मौसम
Rain	water falling from the sky	बारिश
Cool	not hot; a little cold	ठंडा
Fresh	clean and new feeling	ताज़ा
Happy	feeling joy	खुश
Green	the colour of leaves	हरा
Raincoat	a coat worn in the rain	बरसाती कोट
Umbrella	a thing used to stay dry in the rain	छाता
Dirty	not clean	गंदा
Gift	something given with love	उपहार

A2 — Elementary

Monsoon Season

Good morning, respected Principal, teachers, and my dear friends.

Today, I am happy to share my thoughts about the **Monsoon** season, one of the most important seasons in our country.

The monsoon season usually begins in June and continues until September. After the hot and dry summer, dark clouds slowly cover the sky, and cool winds start to blow. Soon after, heavy **rainfall** begins, and the whole atmosphere changes. The temperature drops, and the weather becomes pleasant and **refreshing**.

During this season, we often hear the sound of **thunder** and see flashes of **lightning** in the sky. Although it can feel a bit frightening, it is simply nature's way of releasing energy. The rain also brings a lot of **humidity**, which makes the air feel wet and heavy at times.

Monsoon is extremely important for our farmers because it provides water for their crops. Without enough rainfall, our fields would dry up, and there would not be enough food for people. That is why farmers wait eagerly for the monsoon every year.

However, this season also has some difficulties. Because of continuous rain, many streets suffer from **waterlogging**, and traffic becomes very slow. Sometimes, low-lying areas even face floods, and people's daily lives get affected. We should always check the **weather forecast** before going out, so that we can be prepared.

Despite these small problems, most of us truly **enjoy** the monsoon. We enjoy drinking hot tea, eating pakoras, and watching the rain fall from our windows. Nature also looks incredibly beautiful, with green trees, blooming flowers, and clear rivers.

In conclusion, the monsoon season is a blessing for our environment, our farmers, and our daily lives. We should welcome it with happiness and also take proper care to remain safe during heavy rains.

Thank you very much for listening.

CEFR Vocabulary Used

Word / Phrase	English Meaning	Hindi Meaning
Monsoon	the seasonal rainy period	मानसून
Rainfall	the amount of rain that falls	वर्षा
Refreshing	making you feel fresh and active	ताज़गी देने वाला
Thunder	the loud sound after lightning	बादलों की गड़गड़ाहट
Lightning	a bright flash of light in a storm	बिजली चमकना
Humidity	wetness or moisture in the air	नमी
Waterlogging	water collecting on roads or land	जलभराव
Weather forecast	a prediction about future weather	मौसम का पूर्वानुमान
Enjoy	to take pleasure in something	आनंद लेना

Enjoy

to take pleasure in something

enjoy sth

B1 — Intermediate

Monsoon Season

Respected Principal, honourable teachers, and my dear friends,

Good morning to everyone present here today. I feel privileged to stand before you and speak on a topic that touches every corner of our country — the **Monsoon** season.

The monsoon is a seasonal wind pattern that brings heavy **precipitation** to the Indian subcontinent, typically between June and September. As the southwest monsoon winds travel from the Arabian Sea and the Bay of Bengal, they carry enormous amounts of moisture, which eventually falls as rain across the country.

This season plays a vital role in supporting our **agriculture**. A large percentage of Indian farmers depend entirely on monsoon rains to **irrigate** their fields, since many regions still lack modern irrigation systems. When the monsoon is timely and sufficient, crop production improves, food prices remain stable, and rural communities prosper. On the other hand, a delayed or weak monsoon can severely affect the entire **economy**.

The monsoon also helps to replenish our rivers, lakes, and groundwater levels, which are essential for drinking water throughout the year. Additionally, it cools down the atmosphere after months of scorching heat and revitalises the entire **ecosystem**, allowing forests and wildlife to flourish once again.

Nevertheless, the season is not without its challenges. Poor **drainage** systems in many cities lead to waterlogging and traffic congestion. Low-lying areas often become **vulnerable** to flooding, which can damage homes, disrupt transportation, and even endanger lives. It is therefore important for our government and citizens to work together on better urban planning and disaster preparedness.

In conclusion, the monsoon season is truly a double-edged phenomenon — a blessing that sustains our agriculture and environment, yet a challenge that demands responsible management. Let us appreciate this season while also being mindful of its risks.

Thank you all for your patient attention.

Word Count: **299 words**

CEFR Vocabulary Used

Word / Phrase	English Meaning	Hindi Meaning
Monsoon	seasonal wind bringing rain	मानसून
Precipitation	rain, snow, or water falling from clouds	वर्षण
Agriculture	farming; growing crops	कृषि
Irrigate	to supply water to land or crops	सिंचाई करना
Economy	the trade, industry and money system of a country	अर्थव्यवस्था
Ecosystem	a community of living things and their environment	पारिस्थितिकी तंत्र
Drainage	the system that removes extra water	जल निकासी

Vulnerable

easily harmed or affected

संवेदनशील / असुरक्षित

B2 — Upper Intermediate

Monsoon Season

Respected Principal, esteemed teachers, and my dear friends,

A very good morning to all of you. It is a great honour to address this gathering today on a subject that shapes the very rhythm of life on the Indian subcontinent — the **Monsoon** season.

The monsoon is not merely a period of rainfall; it is a complex **meteorological** phenomenon driven by shifting wind patterns and differential heating between land and sea. As the southwest monsoon sweeps in from the oceans, it unleashes **torrential** downpours that transform parched landscapes into lush, verdant expanses almost overnight.

For a country whose economy remains heavily **agrarian**, the monsoon is nothing short of a lifeline. Millions of farmers time their sowing seasons around its arrival, and any **deviation** from the expected rainfall pattern can trigger a chain reaction — crop failure, rising food prices, and financial hardship for rural households. In this sense, the monsoon is deeply interwoven with our nation's socio-economic fabric.

Beyond agriculture, the rains replenish reservoirs, recharge groundwater tables, and restore the ecological balance disrupted by months of relentless heat. Rivers swell, forests regenerate, and biodiversity flourishes as the monsoon breathes new life into the environment.

Yet, this season is equally capable of unleashing **devastation**. Inadequate urban infrastructure often buckles under the sheer **deluge**, resulting in waterlogged streets, disrupted transport, and, in severe cases, life-threatening floods. Furthermore, stagnant water frequently becomes a breeding ground for waterborne diseases, posing serious public-health risks. It is imperative, therefore, that our cities invest in resilient drainage systems and sustainable urban planning to mitigate these hazards.

In conclusion, the monsoon season embodies a striking duality — a nurturing force that sustains our agrarian economy and ecology, and simultaneously, a formidable challenge that tests our infrastructural resilience. Let us celebrate its bounty while remaining vigilant of its perils.

Thank you for your attention.

Word Count: **305 words**

CEFR Vocabulary Used

Word / Phrase	English Meaning	Hindi Meaning
Monsoon	seasonal rain-bearing wind system	मानसून
Meteorological	relating to weather and climate science	मौसम विज्ञान से संबंधित
Torrential	(rain) falling very heavily and fast	मूसलधार
Agrarian	relating to farming or agriculture	कृषि प्रधान
Deviation	a difference from what is expected	विचलन
Devastation	great destruction or damage	तबाही
Deluge	a very heavy fall of rain; a flood	जलप्रलय / भारी बाढ़

C1 — Advanced

Monsoon Season

Respected Principal, distinguished teachers, and my dear friends,

Good morning to everyone gathered here. I stand before you today to reflect upon a phenomenon that has, for millennia, dictated the socio-economic and ecological destiny of our subcontinent — the **Monsoon** season.

At its core, the monsoon is a large-scale **atmospheric** circulation pattern, arising from the differential thermal capacities of land and ocean, which reverses seasonal wind directions and delivers the bulk of South Asia's annual rainfall within a few concentrated months. This **hydrological** rhythm is so deeply embedded in our civilisation that ancient agrarian societies structured their calendars, festivals, and even mythologies around its arrival.

The monsoon's significance extends far beyond mere precipitation. It underpins **subsistence** agriculture for hundreds of millions, replenishes aquifers essential for perennial water security, and sustains biodiversity across ecosystems that would otherwise succumb to prolonged aridity. Economically, fluctuations in monsoon intensity reverberate through commodity markets, inflation rates, and even the political fortunes of governments, underscoring its **unparalleled** influence on national stability.

However, the monsoon today unfolds within a landscape reshaped by **anthropogenic** climate change, urbanisation, and ecological degradation. Erratic rainfall patterns, unprecedented cloudbursts, and prolonged dry spells have become increasingly commonplace, exposing the fragility of our urban infrastructure and the inadequacy of existing disaster-management frameworks. Vulnerable communities, particularly those in flood-prone and low-lying regions, bear a disproportionate burden of these **vagaries**, often losing homes, livelihoods, and, tragically, lives.

It is incumbent upon us, therefore, to approach the monsoon not merely as a season to be endured or celebrated, but as a complex system demanding scientific foresight, sustainable planning, and collective responsibility. Only through such an integrated approach can we harness its life-giving potential while mitigating its increasingly unpredictable perils.

Thank you for your attention.

Word Count: **293 words**

CEFR Vocabulary Used

Word / Phrase	English Meaning	Hindi Meaning
Monsoon	a seasonal, large-scale wind and rain system	मानसून
Atmospheric	relating to the atmosphere surrounding the Earth	वायुमंडलीय
Hydrological	relating to water cycles and distribution	जल विज्ञान संबंधी
Subsistence	the minimum needed to survive	जीवन निर्वाह संबंधी
Unparalleled	having no equal; unmatched	अद्वितीय
Anthropogenic	caused or influenced by human activity	मानव जनित
Vagaries	unpredictable changes or behaviour	अनिश्चितताएँ

Phrasal-Verb Special Edition

Monsoon Season

Respected Principal, teachers, and my dear friends,

Good morning to all of you. Today, I would like to **talk about** a season that never fails to **bring about** a huge change in our lives — the Monsoon season.

Every year, as summer starts to **die down**, dark clouds begin to **roll in** from the sea, and soon the rain starts to **come down** heavily. Within a few days, the entire atmosphere seems to **cool off**, and the parched land finally gets a chance to **soak up** much-needed water. Children **look forward to** this season all year, waiting eagerly for the clouds to **open up**.

As the rain **sets in**, rivers and lakes begin to **fill up**, and farmers, who had been struggling with dry fields, can finally **carry on** with their sowing. Nature seems to **wake up** again — trees turn green, flowers **spring up** everywhere, and the whole environment appears to **come alive**.

However, monsoon does not always **go smoothly**. Sometimes rain continues for days without stopping, and low-lying areas **get cut off** due to flooding. Traffic often **grinds to a halt** and, on particularly bad days, schools have to **shut down**. Power supply may **go off** for hours, and people have to **put up with** a lot of inconvenience.

Still, most of us **end up** enjoying this season. We **curl up** with a hot cup of tea, **gaze out** at the falling rain, and simply **take in** the beauty of nature. Slowly, as the season **draws to** a close, the skies **clear up**, and we **move on** to the pleasant days of autumn.

To **wrap up**, I would say that the monsoon season, despite its occasional troubles, always manages to **bring in** freshness, hope, and life. Let us **look after** our surroundings and enjoy every drop of this beautiful season.

Thank you for **listening in** so patiently.

Phrasal Verbs Used

Word / Phrase	English Meaning	Hindi Meaning
Talk about	to discuss	के बारे में बात करना
Bring about	to cause something to happen	घटित करना
Die down	to become less strong	शांत होना
Roll in	to arrive continuously / in large numbers	लगातार आना
Come down	(rain) to fall	बरसना
Cool off	to become cooler	ठंडा होना
Soak up	to absorb liquid	सोख लेना
Look forward to	to feel excited about something coming	उत्सुकता से प्रतीक्षा करना
Open up	to start / become active	खुलना / शुरू होना
Set in	to begin and continue	शुरू होकर बने रहना

Fill up	to become full	भर जाना
Carry on	to continue	जारी रखना
Wake up	to become active again	जाग उठना
Spring up	to appear suddenly	अचानक उगना
Come alive	to become lively and active	जीवंत हो उठना
Go smoothly	to happen without problems	आसानी से होना
Cut off	to isolate; block access	कट जाना / अलग हो जाना
Grind to a halt	to stop slowly and completely	धीरे-धीरे रुक जाना
Shut down	to close completely	बंद हो जाना
Go off	to stop working (supply)	बंद हो जाना (बिजली आदि)
Put up with	to tolerate	सहन करना
End up	to finally be in a situation	अंततः किसी स्थिति में पहुँचना
Curl up	to sit comfortably with body pulled in	सिकुड़कर आराम से बैठना
Gaze out	to look steadily outward	बाहर एकटक देखना
Take in	to absorb / appreciate something	आत्मसात करना
Draw to a close	to come near the end	समाप्ति के करीब आना
Clear up	(weather) to become bright and clear	मौसम का साफ होना
Move on	to proceed to the next stage	आगे बढ़ना
Wrap up	to finish or conclude	समाप्त करना
Bring in	to introduce something	लाना / शामिल करना
Look after	to take care of	देखभाल करना
Listen in	to listen attentively	ध्यान से सुनना
