A1 (Beginner)

Speech: Summer Season

Good morning, respected teachers and my dear friends.

Today, I am happy to speak about the **summer** season. Summer is one of the four seasons in a year. It comes after spring and before the rainy season.

In summer, the **weather** is very hot. The sun shines brightly, and the **sky** is blue and clear. The days are long, and the nights are short. Every morning, the sun rises early, and it stays hot until the evening.

Summer is a fun time for students like us because we get long **holidays** from school. We can wake up late, play with friends, and enjoy free time at home. Many families go on a **trip** to cool places like the hills or the beach. The hills are green and cool, and the sea has big waves that are fun to watch and play in.

Summer also brings many tasty **fruits**. Mango is the king of summer fruits, and we all love to eat it. We also enjoy watermelon, litchi, and cold drinks like lemon water and juice. Because it is so hot, we must drink lots of **water** every day to stay healthy.

In summer, we wear **light** and cotton clothes because they keep us cool. We also use fans, coolers, and umbrellas to protect ourselves from the strong sun.

But summer has some problems too. The heat can make us **tired**, and some people feel sick because of the sun. So, we must be careful, drink water, and rest in the shade.

I like summer very much. It gives us holidays, tasty fruits, and happy family time. Summer teaches us to enjoy nature and to take care of our health.

Thank you, everyone.

Word Count: 282 words

CEFR-Level Words Used (English – Hindi Meaning)

Word / Phrase	English Meaning	Hindi Meaning
Summer	The hottest season of the year	Garmi ka mausam
Weather	The condition of the sky and temperature	Mausam
Sky	The space above the earth	Aakash
Holidays	Days when there is no school or work	Chhuttiyan
Trip	A short journey or visit to a place	Yatra
Fruits	Sweet food that grows on trees or plants	Phal
Water	A clear liquid we drink	Paani

Word / Phrase	English Meaning	Hindi Meaning
Light (clothes)	Not heavy; thin and cool clothes	Halke kapde
Tired	Feeling weak and needing rest	Thaka hua

A2 (Elementary)

Speech: Summer Season

Respected principal, teachers, and dear friends, good morning to all of you.

I am standing here today to share a few thoughts about the **summer** season, a season that is full of sunshine, energy, and interesting experiences. Summer usually begins in March and continues until June, bringing with it rising **temperatures** and long, bright days.

During summer, the sun rises early and sets late, giving us plenty of **daylight** to enjoy outdoor activities. Although the heat can be quite **intense**, this season also offers many exciting opportunities. Schools declare summer holidays, and students finally get a chance to relax after months of hard work and exams.

Summer is closely **associated** with fruits like mangoes, watermelons, and litchis, which are not only delicious but also help our body stay cool. People often prefer light, cotton clothing because it allows the skin to breathe and keeps us comfortable in the heat. Cold drinks, lassi, and fresh juices become part of our daily **routine** during these months.

Many families use this season to travel to hill stations or beaches, where the **climate** is pleasant and refreshing. Such trips help us relax, spend quality time with loved ones, and create beautiful memories that last a lifetime.

However, summer also brings certain challenges. High temperatures can cause dehydration, sunburn, and tiredness, especially for people who work outdoors. It is therefore important to drink enough water, avoid direct sunlight during peak hours, and wear suitable protection like hats and sunglasses.

In conclusion, summer is a season of contrasts — intense heat on one side and joyful holidays on the other. If we take proper care of our health, summer can truly become one of the most enjoyable seasons of the year.

Thank you.

Word Count: 286 words

CEFR-Level Words Used (English – Hindi Meaning)

Word / Phrase	English Meaning	Hindi Meaning
Temperature	The measure of how hot or cold something is	Taapman
Daylight	Natural light during the day	Din ka prakash
Intense	Very strong or extreme	Teevra/Tez
Associated	Connected or linked with something	Juda hua

Word / Phrase	English Meaning	Hindi Meaning
Routine	A regular set of daily activities	Dincharya
Climate	The usual weather conditions of a place	Jalvayu
Dehydration	Loss of water from the body	Nirjalikaran
Refreshing	Making one feel fresh and energetic	Taazgi dene wala

B1 (Intermediate)

Speech: Summer Season

Good morning to our respected principal, teachers, and my fellow students.

Today, I would like to reflect on the **phenomenon** of the summer season, a period that significantly influences our daily lives, our environment, and even our emotions. Summer, which typically stretches from March to June in our region, is **characterised** by soaring temperatures, extended daylight hours, and a distinct shift in lifestyle.

One of the most **noticeable** aspects of summer is the intensity of the sun. Temperatures often **fluctuate** between moderately warm and extremely hot, occasionally leading to heatwaves that affect public health and daily **productivity**. Despite this, summer remains a season eagerly anticipated by students, primarily because of the long vacation it brings, allowing us to unwind, pursue hobbies, and spend time with family.

Nature, too, undergoes a visible **transformation** during summer. Water bodies may shrink, agricultural patterns shift, and certain fruits — such as mangoes, melons, and berries — come into abundant season, adding both flavour and nutrition to our diet. Additionally, summer encourages people to adapt their clothing, food habits, and daily schedules to cope with the rising heat, often favouring lighter fabrics and hydrating foods.

From an environmental **perspective**, summer also raises important concerns. Excessive heat can lead to droughts, forest fires, and water scarcity in several regions, reminding us of the urgent need for sustainable practices and responsible water usage. It is our collective responsibility to conserve resources and remain mindful of our environmental footprint, even while enjoying the pleasures this season offers.

In conclusion, summer is far more than just a hot period between spring and monsoon; it is a season of contrasts — bringing both joy and challenges, growth and caution. By understanding and respecting these dynamics, we can make the most of summer while safeguarding our environment for future generations.

Thank you for listening.

Word Count: 300 words

CEFR-Level Words Used (English – Hindi Meaning)

Word / Phrase	English Meaning	Hindi Meaning
Phenomenon	A fact or situation that is observed to happen or exist	Parighatna
Characterised	Described by a typical quality or feature	Visheshta darshana
Noticeable	Easy to see or notice	Ullekhaniya

Word / Phrase	English Meaning	Hindi Meaning
Fluctuate	To change frequently and irregularly	Utaar-chadhav hona
Productivity	The rate of producing or achieving results	Utpadakta
Transformation	A complete change in form or nature	Parivartan
Perspective	A particular way of viewing things	Drishtikon
Sustainable	Able to continue without harming resources	Tikau

B2 (Upper-Intermediate)

Speech: Summer Season

Respected principal, esteemed teachers, and my fellow students, good morning.

It gives me great pleasure to address you today on a subject that touches every one of us in profoundly different ways — the summer season. Far from being a **mere** interval between spring and the monsoon, summer is a complex and **multifaceted** phenomenon that shapes our environment, our economy, and our everyday routines.

Meteorologically, summer is **characterised** by a substantial rise in temperature, driven largely by the earth's **axial** tilt and the resulting increase in solar radiation received by the hemisphere. This heightened exposure to sunlight leads to longer days, shorter nights, and, in many regions, an increased likelihood of heatwaves — a growing **concern** in the context of global climate change.

The socio-cultural implications of summer are equally significant. For students, it heralds the arrival of long-awaited vacations, offering a welcome respite from academic pressures and an opportunity to pursue personal interests, travel, and reconnect with family. For farmers and agricultural communities, however, summer often presents considerable **hardship**, as water scarcity and prolonged dry spells can adversely affect crop yields and livelihoods.

From an ecological standpoint, summer plays a **pivotal** role in various natural processes, including the ripening of seasonal fruits and the migration patterns of certain species. Nevertheless, rising global temperatures have intensified concerns regarding droughts, wildfires, and the depletion of groundwater reserves, underscoring the necessity for more sustainable environmental practices and responsible resource management.

On a personal level, adapting to summer requires a degree of **prudence** — staying adequately hydrated, wearing breathable clothing, and avoiding prolonged exposure to direct sunlight during peak hours. Such measures, though seemingly minor, can significantly mitigate the adverse health effects associated with extreme heat.

In conclusion, summer is a season of striking contrasts, offering both opportunity and challenge in equal measure. By approaching it with awareness, responsibility, and a genuine appreciation for its complexity, we can navigate its demands while fully embracing its many rewards.

Thank you.

Word Count: 325 words

CEFR-Level Words Used (English – Hindi Meaning)

Word / Phrase	English Meaning	Hindi Meaning
Mere	Nothing more than; just	Maatra/Sirf
Multifaceted	Having many different aspects or sides	Bahu-aayami

Word / Phrase	English Meaning	Hindi Meaning
Characterised	Marked or distinguished by a feature	Visheshta hona
Axial	Relating to an axis	Akshiya
Concern	A matter of worry or interest	Chinta
Hardship	Severe suffering or difficulty	Kathinai
Pivotal	Of crucial importance	Mahatvapurna
Prudence	Careful and sensible judgement	Vivek/Savdhani

C1 (Advanced)

Speech: Summer Season

Respected principal, honoured teachers, and my esteemed fellow students, good morning.

I stand before you today to offer a somewhat more **nuanced** reflection on a season we often take for granted — summer. While it is commonly perceived merely as a period of soaring heat and school vacations, summer, upon closer **scrutiny**, reveals itself to be a season of remarkable ecological, social, and economic significance.

Astronomically, summer arises from the tilt of the earth's axis, which results in a more direct angle of solar incidence upon the hemisphere in question. This seemingly simple **mechanism** gives rise to a cascade of consequences: extended daylight, intensified solar radiation, and, increasingly, the **exacerbation** of heatwaves whose frequency and severity have grown markedly in recent decades — a trend widely attributed to anthropogenic climate change.

The season's cultural resonance is equally profound. For students, summer represents a much-anticipated hiatus from academic obligations, a period conducive to introspection, creative pursuits, and the strengthening of familial bonds. Yet this same season imposes considerable hardship upon agrarian communities, whose livelihoods hinge **precariously** on the availability of water and the vagaries of rainfall. Prolonged dry spells can decimate crop yields, exacerbate rural distress, and deepen existing socio-economic disparities.

Ecologically, summer serves an indispensable function, **facilitating** the ripening of seasonal produce and triggering migratory and reproductive behaviours across numerous species. However, the season's escalating **intensity** — manifest in unprecedented heatwaves, diminishing groundwater tables, and an alarming uptick in wildfires — serves as an urgent reminder of humanity's responsibility to adopt more sustainable and judicious environmental practices.

On an individual level, navigating summer wisely necessitates a measure of foresight: maintaining adequate hydration, minimising exposure during peak solar hours, and cultivating an awareness of one's own physiological limits. Such **prudent** conduct, though modest in scope, can meaningfully attenuate the health risks that accompany extreme temperatures.

In conclusion, summer is neither wholly benign nor uniformly burdensome; rather, it is a season defined by paradox — simultaneously nurturing and testing, generous and demanding. It is incumbent upon us, as informed citizens, to engage with this season thoughtfully, balancing enjoyment with environmental stewardship.

Thank you.

CEFR-Level Words Used (English – Hindi Meaning)

Word / Phrase	English Meaning	Hindi Meaning
Nuanced	Characterised by subtle differences in meaning	Sookshm bhed wala
Scrutiny	Very close examination or study	Gahan jaanch
Mechanism	A natural or established process	Kriyavidhi
Exacerbation	The worsening of a situation	Bigadna/Vriddhi
Precariously	In an uncertain or insecure manner	Anishchit roop se
Facilitating	Making a process easier	Sugam banana
Intensity	The extreme degree of strength or force	Teevrata
Prudent	Acting with care and thought for the future	Vivekpurna

Phrasal-Verb Special Edition

Speech: Summer Season

Good morning, respected principal, teachers, and my dear friends.

Every year, as spring **winds down**, summer **rolls in** with its bright sun and long days. I want to **talk about** why this season **stands out** so much in our lives.

As the temperature starts to **heat up**, schools soon **break up** for the holidays, and students **look forward to** weeks of freedom. We **wake up** early, **get up** before the sun becomes too strong, and **head out** to play before the heat **sets in**. By noon, most of us prefer to **stay in** and **cool off** indoors rather than **go out** into the blazing sun.

Families often **set off** on trips to the hills or the beach. We **pack up** our bags, **check in** at hotels, and **while away** lazy afternoons by the pool or the sea. It is a wonderful chance to **catch up** with relatives we rarely see and to **take in** the fresh mountain air.

Of course, summer does not always **go by** smoothly. Sometimes the heat can **wear us out**, and we must **drink up** plenty of water to avoid falling sick. Doctors always **point out** that we should **cover up** in the sun and never **put off** drinking water until we feel thirsty. If we **take care of** ourselves, the heat rarely **gets us down**.

Fruit sellers **set up** their stalls with mangoes, melons, and litchis, and shopkeepers **stock up** on cold drinks as demand **picks up**. Evenings are lovely when the heat finally **dies down**, and families **gather round** for dinner outdoors under a sky lit up with stars.

As I **wrap up** my speech, I would like to say that although summer can **wear people down** with its heat, it more than **makes up for** it with holidays, fruits, family time, and unforgettable memories. Let us **make the most of** this beautiful season while also looking after our health.

Thank you, everyone, for listening.

Word Count: 321 words

Phrasal Verbs Used (English – Hindi Meaning)

Word / Phrase	English Meaning	Hindi Meaning
Wind down	To gradually come to an end	Dheere-dheere samaapt hona
Roll in	To arrive, often steadily	Aana / pahunchna
Stand out	To be noticeably different or better	Alag/vishisht dikhna
Heat up	To become hotter	Garam hona
Break up	To close for a holiday period (school)	Chhuttiyon ke liye band hona
Look forward to	To feel excited about something coming	Utsukta se pratiksha karna

Word / Phrase	English Meaning	Hindi Meaning
Wake up / Get up	To stop sleeping and rise	Jaagna / uthna
Head out	To leave, to start going somewhere	Nikalna / jaana
Set in	To begin and seem likely to continue	Shuru ho jaana
Stay in / Cool off	To remain indoors / to become cooler	Andar rehna / thanda hona
Set off	To begin a journey	Yatra shuru karna
Pack up	To put belongings into bags	Saamaan pack karna
Check in	To register on arrival at a hotel	Hotel mein panjikan karana
While away	To pass time in a relaxed way	Samay bitaana
Catch up	To talk and share news after a gap	Baatcheet karke update hona
Take in	To observe and enjoy surroundings	Aanand lena / nihaarna
Go by	To pass (of time)	Beetna
Wear out / Wear down	To make someone very tired	Thaka dena
Drink up	To finish drinking completely	Poora pee lena
Point out	To draw attention to something	Ingit karna / bataana
Cover up	To protect by covering the body	Dhak lena
Put off	To delay or postpone	Taalna
Take care of	To look after	Dhyaan rakhna
Get someone down	To make someone feel unhappy	Nirash karna
Set up	To arrange or establish	Sthaapit karna / lagaana
Stock up	To buy a large supply of something	Bhandaar karna
Pick up	To improve or increase	Badhna / sudharna
Die down	To become less strong or intense	Kam ho jaana
Gather round	To come together in a group	Ikattha hona
Wrap up	To finish or conclude	Samaapt karna
Make up for	To compensate for something	Kami पूरी karna
Make the most of	To use something as well as possible	Poora laabh uthaana
